

Ion400

Pure, Chilled Purified or Alkaline Water.

Introducing **Something Different.**

The Ion400 is a state of the art water dispensing system that purifies drinking water to a very high standard and then percolates it through layers of natural minerals to produce a soft, silky alkaline ionized water that has been tasted to be believed.

Your Water Preference!

The Ion400 is a *dual-dispensing* water station designed to fill any consumer provided sports bottle with refreshing purified *or* alkaline water in just seconds!

Purified and Alkaline Water!

It is designed for maximum versatility combining aesthetics with a tough durability. It doesn't rust, is virtually impossible to dent, and doesn't need repainting every time it's moved.

The Ion400 will serve equally well in an office, a school, a fitness center, a high-rise - wherever people live, work or play.

Ion₄₀₀

Its purification circuit combines sediment filtration with reverse osmosis and UV sterilization* to produce a clean, delicious water. Our system is 80% more efficient in the process producing less waste water during the purification process. ~1 quart vs. 2 gal with others

Its chiller package has the largest chill tank in the industry to ensure that it always has fresh, chilled water to dispense.

Its unique, elegant design combines aesthetics with versatility and functionality. It may be customized with any graphics package!

It is "green". Its cabinet is poured from a single mold and made from HDPE, a tough, durable, safe and 100% recyclable material - the same as milk bottles.

It is "smart". Its electronic brain controls every facet of operation and also monitors and reports via Ethernet or wireless performance, payment information and alarms.

Maximize revenue with our tamper-proof LCD screen*; ideal as a high-impact advertising platform.

* optional

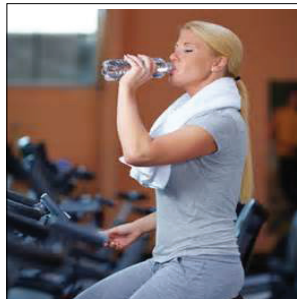

24" wide x 23.5" deep x 71.5" tall

Yoga Studios

Fitness Centers

Offices

The Ion400 can be configured as a dispenser of "free" water. It is also ready to work with a credit/debit or smart card reader. It even works with a traditional coin changer /bill acceptor system.
