

# Dual Dispensing Bulk Water Station

*(Dispenses both Purified & Alkaline Water)*

## M600-BVAA

### Water & Body in Balance.

The M600-BVAA is a state of the art water dispensing system that purifies drinking water to a very high standard. Then percolates it through layers of natural minerals to produce a soft, silky alkaline ionized water.

Or if you prefer, Purified Water in one, three and five gallon increments from the same water station.

## Purified and Alkaline Water!

### Features

Four stages of filtration remove suspended solids and organic matter.

Reverse osmosis then removes dissolved solids\*

Ultra-violet light kills pathogens.

Dual-dispensing! Choose from purified or alkaline water from a single WaterStation!

\* *Optimized processing technology that reduces 80% of the water byproduct during the purification process*

## System Features

From 500 gallons per day to 2,500 gallons per day.

Up to 6 system alarms monitored remotely.

Vandal resistant cabinet, ideal for "Outer Wall" placements.

High visibility, fully back-lit front.

Can accept cash/bill, smart card, or debit/credit card.

Available in 110V/220V, 60hz/50hz.
